

# Release Notes: ProcessMaker 3.3.9

Release Date: April 29th, 2019

This document contains the Release Notes for ProcessMaker 3.3.9. These Release Notes are cumulative. Therefore, bug fixes associated with this release are documented unless otherwise noted.

[A list of older ProcessMaker release notes is included at the end of this document.](#)

## Links to System Requirements and Special Instructions for This Release

1. [Supported Stacks](#)
2. [Supported Web Browsers](#)
3. [ProcessMaker 3.3.0 or later must be installed to upgrade to ProcessMaker 3.3.9](#)

## Plugin Release Associated to This Release

ProcessMaker 3.3.9 was released concurrently with the following Enterprise plugin:

- [Data Reporting Tools 1.1.8](#)

## Bug Fixes

This section documents bug fixes for ProcessMaker 3.3.9:

1. **Exporting a Dynaform that has been previously imported creates variables correctly:** Variables in all controls, grids and subforms correctly import with the variables added on the form.
2. **Users can correctly change the password at next logon:** After activating [User must change password at next logon](#), users can correctly change their passwords.
3. **In a list, columns no longer change for all users if any other user unchecks a column:** In [Inbox](#), [Draft](#), [Participated](#), [Unassigned](#), [Paused](#), [Advanced Search](#), [Review](#) and [Reassign](#) lists, the columns sorting no longer changes for all users if any other user unchecks a column.
4. **Self-service performance is improved:** The performance is improved when a case is claimed, a case is completed that previously was claimed, and a case is deleted that previously was unassigned.
5. **The process performance to complete cases is improved:** This change improves the performance when verifying a completed case is done and when using the [upgrade](#), [workspace-restore](#) and [migrate-new-cases-lists](#) commands.

6. **The query that calculates the total unassigned cases was improved:** This affects the counter found in the [Self Service](#) (users, groups and both) and [Self Service Value Based Assignment](#) (users, groups and both).
7. **Importing a process and then running a case no longer displays an error:** Importing a BPMN or classic process and then running cases no longer displays an error message related to a missing XML file.
8. **Variables after routing triggers correctly save their values:** When managing multiple triggers placed in the [After Routing](#) section of tasks in a process, the variables are updated correctly according to the triggers.
  - **Scope:** This bug affects ProcessMaker version 3.3.1 and later.
9. **Task Properties from a parallel task no longer display a Runtime Exception error:** The task information displays correctly when the case opens from [Jump To](#) in Inbox, Draft, Participated, Unassigned and Paused trays.
10. **Process diagrams now export correctly:** Process diagrams with different process elements now [export](#) without errors when the element titles contain the characters <, >, &, double quotes or single quotes.
11. **Task email notifications display correctly in Message History:** The email notifications display correctly in [Message History](#). Email notifications include the following:
  - PM functions like [PMFSendMessage\(\)](#) and [PMFSendMessageToGroup\(\)](#)
  - [Tasks](#)
  - [Email events](#)
  - [Actions by Email](#)
  - [Case notes](#)
  - SOAP function [sendMessage\(\)](#)
12. **Date labels display according to the user's timezone:** In [message history](#), [Uploaded Documents](#) summary, [Generated Documents](#) summary and [Email Log](#), date labels display correctly the date and time configured on [Time Zone](#).

## Known Issues

This section documents known issues for ProcessMaker 3.3.9:

1. **ProcessMaker does not export process diagrams after changing the task type:** After clicking [Export Diagram](#), the process diagram does not export.
  - **Workaround:** Reload the workflow process to export the diagram.

2. **Adding custom columns, may create a disorder within the user column's preferences:** After adding [custom columns](#) to the [cases list](#) and before a hidden column, the cases list shows the added column and it hides the left column.
3. **In the Process Information and Change Log, the date and time labels displays in UTC format:** In the [Process Information](#) and [Change Log](#), the date and time labels don't display the date and time in the [user's time zone](#).

## Previous Release Notes

Refer to the previous release notes from ProcessMaker versions 3.2 through 3.3.8:

- [3.3.8](#)
- [3.3.7](#)
- [3.3.6](#)
- [3.3.5](#)
- [3.3.4](#)
- [3.3.3](#)
- [3.3.2](#)
- [3.3.1](#)
- [3.3.0](#)
- [3.2.3](#)
- [3.2.2](#)
- [3.2.1](#)
- [3.2](#)
