Improvements

This section documents improvements for ProcessMaker 3.5.9:

1. **Timeout trigger runs correctly after it has reached the defined time interval:** Unassigned cases task in cron works correctly when the `system_utc_time_zone` parameter is enabled. The time interval is not affected by time zones or calendars. It records a standard log with the following information:
 - Severity: INFO
 - Channel: Unassigned
 - Message: Timeout trigger execution
 - [Additional information](#): AppUid, AppNumber, TaskUid, DelIndex, TriggerUid
