Bug Fixes

This section documents bug fixes for ProcessMaker 3.5.10:

1. **Inactive processes are not able to initiate cases when they are inactive:** Cases are properly not accessible anymore when trying to start PM processes with the Inactive status enabled.
2. **Cases that continue from email link display correctly in the Unassigned inbox:** When opening parallel cases from an email link, they display correctly in the Unassigned PM inbox.
3. **The Cancel button works correctly on the Claim Case form:** After continuing a PM thread case by clicking an email link, the **Cancel** button works correctly in the Claim Case form from the **Unassigned** tray.
4. **Label and key on suggest controls in grids display the values correctly:** Label and key values keep the selected values when using suggest controls on PM Dynaform grids and after changing between tasks in edit and view modes.
