3. [ProcessMaker 3.3.0 or later must be installed to upgrade to ProcessMaker 3.3.13](#)

Bug Fixes

This section documents bug fixes for ProcessMaker 3.3.13:

1. **Textboxes in view mode with number values and a letter among them now show their values correctly:** [Textboxes](#) in view mode no longer cast strings with numbers to numbers. This was happening when a string with numbers had an “e” character in the middle.
2. **The message when modifying the case data from the Batch Routing list has been updated:** The message when [modifying the case data from the Batch Routing list](#) has been updated to “The modification will be applied to all rows”.
3. **Email templates display correctly the value variables with the @ character:** [Email template](#) creation correctly saves variable values that contain the @ character.
4. **PM_USERS no longer removes System and System information:** The [PM_USERS](#) permission no longer removes the [System](#) and System information options. These options are accessible with the [PM_SETUP_ADVANCE](#) permission.
5. **In the ProcessMaker Community edition, cases correctly display in the cases list accordingly after routing cases:** Each tray in the [Cases list](#) correctly displays their cases.
 - **Scope:** This bug affects ProcessMaker Community edition 3.3.11 and 3.3.12.
6. **When importing a process, the Change Log no longer is lost:** When [exporting and importing](#) a process in the same workspace, the process correctly exports the Dynaform DYN_ID instead of creating them as new Dynaforms. Then, the [Change Log](#) associated with that Dynaform is no longer lost.

7. **Pending emails in CC no longer cumulate when resending through Cron:** Pending emails correctly resend through the **emails** option enabled in [Cron](#) and no longer add the CC or BCC receivers to the next emails.

Known Issues

This section documents known issues for ProcessMaker 3.3.13:

1. **Issue with dependency in grids:** Dependent dropdown controls in grids do not display their values in the next task.
 - **Scope:** This bug affects ProcessMaker 3.3.12 and 3.3.13.

Previous Release Notes

Refer to the previous Release Notes from ProcessMaker versions 3.2 through 3.3.12:

- [3.3.12](#)
- [3.3.11](#)
- [3.3.10](#)
- [3.3.9](#)
- [3.3.8](#)
- [3.3.7](#)
- [3.3.6](#)
- [3.3.5](#)
- [3.3.4](#)
- [3.3.3](#)
- [3.3.2](#)
- [3.3.1](#)
- [3.3.0](#)
- [3.2.4](#)
- [3.2.3](#)
- [3.2.2](#)
- [3.2.1](#)
- [3.2](#)
