Release Date: August 19th, 2019

This document contains Release Notes for ProcessMaker 3.3.15. Release Notes are cumulative, and document bug fixes associated with this release unless otherwise noted. A list of older ProcessMaker release notes is included at the end of this document.

Links to System Requirements and Special Instructions for This Release

1. Supported Stacks
2. Supported Web Browsers
3. ProcessMaker 3.3.0 or later must be installed to upgrade to ProcessMaker 3.3.15

Bug Fixes

This section documents bug fixes for ProcessMaker 3.3.15:

1. **Memory now works correctly using the executeQuery function:** Memory no longer decreases with each trigger execution that contains the `executeQuery` function when it calls a PM Table with millions of records.
